#32 Rubber Cutting Saw

There is no other product quite like REMA TIP TOP's Rubber Cutting Saw. The rugged construction and precise engineering will deliver years of unmatched performance. It's successful track record for over 20 years insures your satisfaction. REMA TIP TOP uses a unique gearing arrangement that allows the high torque blade to assist in the forward movement of the saw. This allows the operator to guide the saw rather than having to push it. The Rubber Cutting Saw's roller bed base allows the material you are cutting to effortlessly feed into the blade. In addition, the bed rolls over your cutting surface eliminating the need to have to hold the saw in position. This greatly reduces the strain on the operator.

- Significantly reduces finger splice prep time
- Easy to handle and use
- Safer to use than knives
- Cuts rubber from 40 - 90 Shore A hardness and up to 2" thick
- Cuts UHMW & plastics
