REMA COMBI-SKIRT

Dual Durometer Skirt Board Rubber *"The Best of Both Worlds"*

Longer Lasting Performance

- REMA COMBI-SKIRT will last 2 to 5 times longer than conventional skirt board rubber, specially in heavy impact areas
- This means less maintenance dollars spent on skirt board rubber replacement.

Better Impact Resistance

- REMA COMBI-SKIRT was designed to resist heavy impact at loading areas by combining a layer of REMASKIRT 60 on one side to absorb impact, with REMASKIRT 50 to provide excellent sealing properties
- This truly offers the "Best of Both Worlds" for your skirt rubber needs.

Reduced Belt Wear

- By designing REMA COMBI-SKIRT with a "softer side", REMASKIRT 50, it not only provides optimum sealing properties but it will not groove the top cover of your conveyor belt.
