REMASKIRT 50

Conveyor Skirt Board Rubber

- Longer Lasting Performance
- Better Containment and Sealing
- Reduced Belt Wear

Longer Lasting Performance

- **REMASKIRT 50** will last 2 to 5 times longer than conventional skirt board rubber.
- This means less maintenance dollars spent on skirt board rubber replacement.

Better Containment and Sealing

- **REMASKIRT 50** is a natural rubber compound with 4206 psi tensile strength and a Shore A Hardness of 50.
- The softer style rubber provides excellent sealing against your conveyor belting to contain material and help reduce dust.

Reduced Belt Wear

- Since **REMASKIRT 50** is a softer rubber, compared to conventional skirting, it will not groove the top cover of your conveyor belt.
